GMT python scripting for  
computational science pdf -

Linear programming (LP,  
also called linear  
optimization) is a method to  
achieve the best outcome  
(such as maximum profit or  
lowest cost) in a  
mathematical model whose  
requirements are  
represented by linear  
relationships. Linear  
programming - Wikipedia -

In computing, a visual  
programming language  
(VPL) is any programming  
language that lets users  
create programs by  
manipulating program  
elements graphically rather  
than by specifying them  
textually. Visual  
programming language -
